STATE-OF-THE-ART R&D

Godshall's is uniquely capable of responding to the requests of a rapidly evolving market. "Our 7,500 square foot R&D center is actually a fully equipped production facility, capable of making anything at experimental batch scale" Explains COO Ron Godshall. "the benefit is two-fold; we don't interrupt the flow of even one production line to make a new item or recipe. And we have a facility whose sole focus is innovation on both the incremental and transformative scale. It allows us to keep doing what made us a leader while devoting our other facilities to delivering the volumes required to service America's largest retailers!"

Godshall's is ready for the constantly changing consumer landscape with healthier, tastier ideas and the means to produce them for you!
